

## - MPT104 HIDDEN LAKE TREKKING AND PHOTO TOUR -

Our focus is on helping you capture exceptional images of wildlife and landscapes. This tour is designed to discover the valleys, peat bogs, lakes, and wildlife of hidden Lake. This tour is designed for active photographers who joined the pleasure of walking on the mountain and capture photo.

M.de Cruz-Magellanic NT

We initiate the tour in Ushuaia's city, we drive through the National route N° 3 to the East. We go out of the city and the landscape changes completely: ranges, valleys, peat bogs, beaver's dams, forests of High deciduous beech (lengas), Low deciduous beech (ñires) and Evergreen beech (coihues) will surprise us.

After crossing Olivia's River we border the homonym mountain to realize our first stop in the viewing-point of Carbajal valley where we will appreciate the immensity of the place, the relief and the glaciers formations. It is one of the best places for Landscape and macro photography.

The Garibaldi Pass (430 mts over the sea level); the guide will explain the behavior of wildlife. After we will cross the Mountain range of the Andes, we will arrive at a panoramic view of the Lakes Escondido and Fagnano. It is an opportunity for macro and wildlife photography. We continue to Lago Escondido.

When we reached the limit of vegetation, we started walking from 430 metres to 600. This is the point where we can enjoy the flora and fauna of the high Andes.

Return to Ushuaia. **Duration:** 8 hours.
